If you have been newly diagnosed with prostate cancer, you will want to take the time to think about your choices and to talk with your doctor and your loved ones about the best course of action for you and find out if you are a candidate for the Oncotype DX® prostate cancer test.

Q: What is my Gleason score, PSA level and tumor stage? Do I have very-low-risk, low-risk, intermediate-risk or high-risk prostate cancer?
A:

Q: Can I be sure that the biopsy reflects all the cancer in my prostate?
A:

Q: Is there a way to tell if my prostate cancer is the slow growing or fast growing type?
A:

Q: Could the Oncotype DX® prostate cancer test help determine whether I truly have the slow growing type of low risk cancer?
A:

Q: Is my prostate cancer still localized, or has it spread to other parts of my body?
A:
Questions to Ask Your Doctor About Your Treatment Options

Q: What are my treatment options, given the stage of my disease?
A:

Q: I have heard that very few men die of prostate cancer, is that true?
A:

Q: What is active surveillance, and is it an option for me?
A:

Q: What are the benefits of each treatment option? What are the drawbacks/side effects of each one?
A:

Q: How long do side effects last? Do they go away once treatment is complete?
A:
Q: If I choose active surveillance and later find out that the disease is higher risk, can I still have treatment and possibly be cured?

A:

Q: Is it OK to take a few weeks to consider my treatment plan options before I make a decision about treatment?

A:

Q: Can the Oncotype DX® results help determine if active surveillance or immediate treatment is the best treatment for me?

A:

Q: How can I get a copy of my pathology report and Oncotype DX® prostate cancer test results?

A:
